DEMOCRACY INTERNATIONAL FUND

Investment Objective

The Democracy International Fund (the “Fund”) seeks to track the total return performance, before fees and expenses, of the Democracy Investments International Index (the “Index”).

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.50%
Other Expenses	0.00%
Acquired Fund Fees and Expenses	<u>0.12%</u>
Total Annual Fund Operating Expenses ¹	0.62%
Less Fee Reductions and/or Expense Reimbursements ²	<u>(0.12)%</u>
Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements ¹	0.50%

¹ The Total Annual Fund Operating Expenses in this fee table, both before and after fee reductions and/or expense reimbursements, do not correlate to the expense ratio in the Fund’s Financial Highlights because the Financial Highlights include only the direct operating expenses incurred by the Fund, and exclude Acquired Fund Fees and Expenses.

² Democracy Investment Management, LLC (the “Adviser”) has contractually agreed to waive fees and reimburse expenses in the amount of the Acquired Fund Fees and Expenses incurred by the Fund until April 30, 2025. This agreement may be terminated: (i) by the Board of Trustees (the “Board”) of The Advisors’ Inner Circle Fund III (the “Trust”), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on April 30, 2025.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses (including one year of capped expenses in each

period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$51	\$186	\$334	\$763

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the Example, affect the Fund’s performance. During its most recent fiscal year, the Fund’s portfolio turnover rate was 55% of the average value of its portfolio.

Principal Investment Strategies

The Democracy International Fund passively tracks the Democracy Investments International Index (the “Index”), which starts with a market capitalization weighted international (ex-United States) universe and then tilts the market capitalization weightings of the countries represented in the Index (using The Economist Group, Limited’s Democracy Index) to result in an underweighting, relative to its market capitalization, of authoritarian countries, and an overweighting of more democratic countries.

The Fund uses a “passive management” (or indexing) approach in seeking to achieve its investment objective of tracking the total return performance, before fees and expenses, of the Index. The Index is comprised of companies located across the globe, but weights more heavily in the aggregate companies located in countries that are democracy-friendly and weights less heavily in the aggregate companies located in countries with authoritarian regimes. Democracy Investments Index Provider LLC (the “Index Provider”), the Fund’s index provider and an affiliate of the Adviser, analyzes the degree to which a country is democratic or authoritarian by looking to the “Democracy Score” assigned to that country by The Economist Group, Limited’s Democracy Index. A country’s Democracy Score can range from 0-10, with 0 being the lowest Democracy Score and 10 being the highest Democracy Score, and is a composite of sixty indicators, which are grouped into the following five categories:

1. Electoral process and pluralism
2. Civil liberties
3. The functioning of government

4. Political participation

5. Political culture

The higher a country's Democracy Score, the more democratic is the country, while the lower a country's Democracy Score, the less democratic is the country. The Index Provider has constructed the Index in order to overweight, in the aggregate, investment in democracies that embrace ideals such as freedom of speech, fair elections and civil liberties and underweight, in the aggregate, investment in authoritarian states with links to human rights abuses such as genocide and child labor, as well as environmental abuses and government corruption. The Index is designed for investors whose values align with this investment thesis.

The Index Provider determines the country in which each company in the Index is located based on the "country of risk" designation assigned to the company by Refinitiv. A company's country of risk designation is based on a number of criteria, including the country in which the company is domiciled, the primary stock exchange on which the company's shares trade, the location from which the majority of the company's revenues are generated, and the company's reporting currency.

The Index construction process begins with the universe of companies that are current members of the Solactive GBS Global Markets ex United States Large & Mid Cap USD Index NTR (market cap weighted, international equities) (the "Solactive Index"). As of April 15, 2024, the Solactive Index consists of over 2,900 individual companies representing 49 countries and intends to track the performance of the large and mid cap segment covering approximately the largest 85% of the free-float market capitalization in global markets (as determined by Solactive AG ("Solactive")), excluding the United States. The Index Provider first uses the country of risk assigned by a third party data provider (such as Refinitiv or Bloomberg) to each company in the Solactive Index to determine the country in which each such company is located. The Index Provider then multiplies each company's market capitalization weighting in the Solactive Index by the Democracy Score of the country in which the company is determined to be located and normalizes the products to sum to 100%. In other words, the weight of a specific company in the Index is the product of the company's Democracy Score and its market capitalization weighting in the Solactive Index (the "Market Capitalization Product") divided by the sum of all the Market Capitalization Products of all companies in the Index. As a result, each company in the Solactive Index is represented in the Index, but with a different weighting that results from its Democracy Score. In this regard, the Index will consist of companies from countries with both high and low Democracy Scores, but companies located in countries with higher Democracy Scores generally are weighted more heavily in the aggregate and companies

located in countries with lower Democracy Scores are weighted less heavily in the aggregate. The Index is currently weighted more heavily in companies located in countries from developed markets as compared to emerging markets. The Index is rebalanced and reconstituted on a quarterly basis.

In constructing the Fund's portfolio, the Adviser generally will use a representative sampling investment approach designed to achieve the Fund's investment objective. In doing so, the Fund generally will hold (i) the securities of certain, but not all, Index constituents, consisting of common stocks and American Depositary Receipts ("ADRs") of large- and medium-capitalization companies, and (ii) shares of country and regional-specific exchange traded funds ("ETFs"), in combination such that the Fund's returns are designed to track the total return performance, before fees and expenses, of the Index, and the Fund's portfolio is designed to approximate the Index's country and sector weightings, and other characteristics such as market capitalization. The Adviser's representative sampling strategy will result in the Fund (i) having exposure to companies that are located in the same countries as companies in the Index but that are not themselves Index constituents, and (ii) not owning or otherwise not having exposure to companies that are included in the Index. ETFs currently represent a significant portion of the Fund's portfolio.

In addition to investing in ETFs as discussed above, the Fund also may invest in securities or other investments not included in the Index, but which the Adviser believes will help the Fund to track the Index. For example, the Fund may invest in securities that are not components of the Index so as to reflect various corporate actions and other changes to the Index (such as Index reconstitutions, additions, and deletions).

The Fund may from time to time invest a significant portion of its assets in the securities of companies in one or more countries, geographic regions or economic sectors. As of the date of this Prospectus, the Fund has significant exposure to the financials sector, as defined by the Global Industry Classification Standard ("GICS").

Principal Risks

As with all mutual funds, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any other government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Equity Market Risk — The risk that stock prices will fall over short or extended periods of time, sometimes rapidly and unpredictably. The value of equity securities will fluctuate in response to factors affecting a particular company, as

well as broader market and economic conditions. Broad movements in financial markets may adversely affect the price of the Fund's investments, regardless of how well the companies in which the Fund invests perform. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Moreover, in the event of a company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stock holders such as the Fund.

Common Stock Risk — The prices of common stock may fall over short or extended periods of time. Common stock generally is subordinate to preferred stock and debt upon the liquidation or bankruptcy of the issuing company.

Foreign Securities Risk — Investing in foreign companies poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the "SEC") and foreign companies are generally not subject to the same level of regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund's portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers and foreign markets and securities may be less liquid. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund.

Emerging Markets Risk — The Fund's investments in emerging markets securities are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign securities. Unlike more established markets, emerging markets may have governments that are less stable, markets that are less liquid and economies that are less developed. In addition, the securities markets of emerging market countries may consist of companies with smaller market capitalizations and may suffer periods of relative illiquidity; significant price volatility; restrictions on foreign investment; and possible restrictions on repatriation of investment income and capital. Furthermore, foreign investors may be required to register the proceeds of sales, and future

economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies. The Fund considers an emerging market country to be any country determined to be an emerging market country by Solactive's country classification framework.

Democracy Focused Investments Risk — The Index, and thus the Fund's portfolio, generally weights more heavily in the aggregate companies located in countries with higher Democracy Scores and weights less heavily in the aggregate companies located in countries with lower Democracy Scores. A company's financial performance is determined by a number of factors, and whether or not the company is located in a country with a higher Democracy Score may have little or no impact on whether the company performs well financially or positively affects the Fund's performance. Companies located in countries with higher Democracy Scores may underperform companies located in countries with lower Democracy Scores. The Fund may forego some market opportunities available to funds that do not invest in a company based on the Democracy Score of the country in which it is located and, therefore, the Fund may underperform such other funds.

In addition, the Index's methodology weights a company based on the product of its Democracy Score and market capitalization. Accordingly, the Fund may hold the securities of companies with large market capitalizations located in countries with lower Democracy Scores in greater weight than the securities of companies located in countries with higher Democracy Scores. In this regard, shareholders may have significant exposure to particular companies located in more authoritarian countries and will at all or most times have some exposure to companies located in more authoritarian countries.

Currency Risk — As a result of the Fund's investments in securities or other investments denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, resulting in the dollar value of an investment in the Fund being adversely affected. Currency exchange rates may fluctuate in response to, among other things, changes in interest rates, intervention (or failure to intervene) by U.S. or foreign governments, central banks or supranational entities, or by the imposition of currency controls or other political developments in the United States or abroad.

Geographic Focus Risk — To the extent that it focuses its investments in a particular country or geographic region, the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that country or geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

Investments in ETFs Risk — When the Fund invests in an ETF, the Fund will be subject to substantially the same risks as those associated with the direct ownership of the securities comprising the index on which an index ETF is based or the other holdings of an ETF, and the value of the Fund’s investment will fluctuate in response to the performance of the underlying index or holdings. ETFs typically incur fees that are separate from those of the Fund. Accordingly, the Fund’s investments in ETFs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the ETFs’ operating expenses, in addition to paying Fund expenses.

Large Capitalization Companies Risk — The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Medium Capitalization Companies Risk — The risk that medium capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, medium capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, medium capitalization stocks may be more volatile than those of larger companies. Medium capitalization stocks may be traded over-the-counter or listed on an exchange.

ETF Risks — The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:

Index Tracking Risk — The Fund’s return may not match or achieve a high degree of correlation with the return of the Index. Because it uses a representative sampling approach, the Fund may experience a greater degree of tracking error than if the Fund sought to hold all of the securities of the Index in proportion to their weighting in the Index.

Passive Investment Risk — The Fund is not actively managed and therefore the Fund would not sell a security due to current or projected underperformance of the security, industry or sector, unless that security is removed from the Index or selling the security is otherwise required upon a rebalancing of the Index.

Trading Risk — Shares of the Fund may trade on NYSE Arca, Inc. (the “Exchange”) above or below their net asset value (“NAV”). The NAV of shares of the Fund will fluctuate with changes in the market value of the Fund’s holdings. In stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying holdings, which may cause a variance in the market price of the Fund shares and their underlying value. In addition, although the

Fund's shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares of the Fund inadvisable. The Fund's representative sampling approach to tracking the Index may cause the Fund's shares to trade with wider bid/ask spreads than if the Fund used a replication strategy or different representative sampling strategy.

Methodology Risk — The Fund seeks to track the performance of the Index. No assurance can be given that stocks of companies chosen for the Index will outperform stocks of other companies. Moreover, there is no guarantee or assurance that the methodology used to create the Index will result in the Fund achieving positive investment returns or outperforming other investment products.

New Index Provider Risk — The Index was created by and is owned and maintained by the Index Provider, which has not previously been an index provider for a registered fund, which may create additional risks for investing in the Fund. There is no assurance that the Index Provider will compile the Index accurately, or that the Index will be reconstituted, rebalanced or disseminated accurately.

Limited Authorized Participants, Market Makers and Liquidity Providers Risk — Because the Fund is an ETF, only a limited number of institutional investors (known as "Authorized Participants") are authorized to purchase and redeem shares directly from the Fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material discount to NAV and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Cash Transactions Risk — Unlike certain ETFs, the Fund may effect some or all creations and redemptions using cash, rather than in-kind securities. Because of this, the Fund may incur costs such as brokerage costs or be unable to realize certain tax benefits associated with in-kind transfers of portfolio securities that may be realized by other ETFs.

ADR Risk — ADRs are certificates evidencing ownership of shares of a foreign issuer that are issued by American depository banks and generally trade on an established U.S. market. ADRs are subject to many of the risks associated with investing directly in foreign securities, including, among other things, political,

social and economic developments abroad, currency movements and different legal, regulatory and tax environments.

Issuer-Specific Risk — Fund performance depends on the performance of individual securities to which the Fund has exposure. Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.

Liquidity Risk — Certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to accept a lower price to sell a security, sell other securities to raise cash, or give up an investment opportunity, any of which could have a negative effect on Fund management or performance.

Sector Focus Risk — Because the Fund may, from time to time, be more heavily invested in particular sectors, the value of its shares may be especially sensitive to factors and economic risks that specifically affect those sectors. As a result, the Fund's share price may fluctuate more widely than the value of shares of a fund that invests in a broader range of sectors.

Financials Sector Risk — Performance of companies in the financials sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. The impact of more stringent capital requirements, recent or future regulation of any individual financial company, or recent or future regulation of the financials sector as a whole cannot be predicted. In recent years, cyber attacks and technology malfunctions have become increasingly frequent in this sector and have caused significant losses to companies in this sector, which may negatively impact the Fund.

Performance Information

The bar chart and the performance table below illustrate the risks of an investment in the Fund by showing the Fund's performance from year to year and by showing how the Fund's average annual total returns for 1 year and since inception compare with those of a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available by calling toll-free to 1-877-776-3629 (1-877-PRO-DMCY).

BEST QUARTER WORST QUARTER

14.30%	(13.93)%
12/31/2022	6/30/2022

The performance information shown above is based on a calendar year. The Fund’s performance from 1/1/2024 to 3/31/2024 was 4.67%.

Average Annual Total Returns for Periods Ended December 31, 2023

This table compares the Fund’s average annual total returns for the periods ended December 31, 2023 to those of an appropriate broad-based index and additional indexes.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”).

Democracy International Fund	1 Year	Since Inception (3/31/2021)
Fund Returns Before Taxes	17.13%	2.39%
Fund Returns After Taxes on Distributions	16.34%	1.69%
Fund Returns After Taxes on Distributions and Sale of Fund Shares	10.78%	1.78%
Democracy Investments International Index (reflects no deduction for fees, expenses or taxes)	17.95%	2.21%
Solactive GBS Global Markets ex US Large & Mid Cap NTR Index (USD) (reflects no deduction for fees, expenses or taxes)	15.82%	0.59%
MSCI ACWI ex-USA Index (Net) (USD) (reflects no deduction for fees, expenses or taxes)	15.62%	0.43%
FTSE All World ex-USA Total Return Index (USD) (reflects no deduction for fees, expenses or taxes)	16.20%	1.14%

Investment Adviser and Sub-Adviser

Democracy Investment Management LLC (the “Adviser”), a majority women-owned and veteran-owned firm, serves as the investment adviser to the Fund. Vident Asset Management (the “Sub-Adviser”) serves as the sub-adviser to the Fund.

Portfolio Managers

Democracy Investment Management LLC

Christopher Browne, CFA, Chief Investment Officer of the Adviser, has served as a portfolio manager of the Fund since its inception in 2021.

Vident Asset Management

Rafael Zayas, CFA, Senior Vice President, Head of Portfolio Management and Trading of the Sub-Adviser, has served as a portfolio manager of the Fund since its inception in 2021.

Austin Wen, CFA, Portfolio Manager of the Sub-Adviser, has served as a portfolio manager of the Fund since April 2024.

Purchase and Sale of Fund Shares

The Fund issues shares to (or redeems shares from) certain institutional investors known as “Authorized Participants” (typically market makers or other broker-dealers) only in large blocks of at least 10,000 shares known as “Creation

Units.” Creation Unit transactions are conducted in exchange for the deposit or delivery of a portfolio of in-kind securities designated by the Fund and/or cash.

Individual shares of the Fund may only be purchased and sold on the Exchange, other national securities exchanges, electronic crossing networks and other alternative trading systems through your broker-dealer at market prices. Because Fund shares trade at market prices rather than at NAV, Fund shares may trade at a price greater than NAV (premium) or less than NAV (discount). When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) (the “bid-ask spread”). When available, recent information regarding the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads will be available at www.democracyinvestments.com.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account (“IRA”), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s web site for more information.

INDEX INFORMATION/TRADEMARK LICENSE/DISCLAIMERS

The Index is the property of the Index Provider. The Index Provider has licensed the Index to the Trust at no charge.

The Index Provider has contracted with Solactive to calculate and maintain the Index. The Fund is not sponsored, promoted, sold or supported in any other manner by Solactive nor does Solactive offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index price at any time or in any other respect. The Index is calculated and published by Solactive. Solactive uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the Index Provider or the Fund, Solactive has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the Fund. Neither publication of the Index by Solactive nor the licensing of the Solactive Index or Solactive Index trade mark for the purpose of use in connection with the Fund constitutes a recommendation by Solactive to invest capital in the Fund nor does it in any way represent an assurance or opinion of Solactive with regard to any investment in the Fund.

Democracy Investments LLC has contracted with The Economist Group, Limited for use of the Democracy Index. The Fund is not sponsored, promoted, sold or supported in any other manner by The Economist Group, Limited nor does The Economist Group, Limited offer any express or implicit representation, warranty, guarantee or assurance either with regard to the results of using the Democracy Index and/or Democracy Index trade mark or with regard to the advisability of investing in the Fund or securities generally, in each case at any time or in any other respect. The Democracy Index is calculated and published by The Economist Group, Limited. The Economist Group, Limited uses its best efforts to ensure that the Democracy Index is calculated correctly. Irrespective of its obligations towards Democracy Investments LLC, The Economist Group, Limited has no obligation to point out errors in the Democracy Index to third parties including but not limited to investors and/or financial intermediaries of the Fund. Neither publication of the Democracy Index by The Economist Group, Limited nor the licensing of the Democracy Index or Democracy Index trademark for the purpose of use in connection with the Fund constitutes a recommendation by The Economist Group, Limited to invest capital in said Fund nor does it in any way represent any representation, warranty, assurance or opinion of The Economist Group, Limited with regard to any investment in this Fund. Without limiting any of the foregoing, in no event shall The Economist Group, Limited have any liability for any lost profits, damages or losses in with regard to use of the Democracy Index or investing in the Fund.

MORE INFORMATION ABOUT THE FUND'S INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the Fund is not a fundamental policy and may be changed by the Board without shareholder approval.

The Fund uses a “passive management” (or indexing) approach in seeking to achieve its investment objective of tracking the total return performance, before fees and expenses, of the Index. The Index is comprised of companies located across the globe, but weights more heavily in the aggregate companies located in countries that are democracy-friendly and weights less heavily in the aggregate companies located in countries with authoritarian regimes. The Index Provider analyzes the degree to which a country is democratic or authoritarian by looking to the “Democracy Score” assigned to that country by The Economist Group, Limited’s Democracy Index. A country’s Democracy Score can range from 0-10, with 0 being the lowest Democracy Score and 10 being the highest Democracy Score, and is a composite of sixty indicators, which are grouped into the following five categories:

1. Electoral process and pluralism

Indicators relate to whether national and municipal elections are free and fair, whether adults enjoy universal suffrage and cast votes free from threats, campaign laws, transparency of political financing, the manner in which power is transferred, political party structure, and access to public office and political and civic organizations.

2. Civil liberties

Indicators relate to whether there are free electronic and print media, whether there is free expression to protest, whether media coverage is robust, access to the internet, whether citizens are free to form professional organizations and trade unions, the ability of citizens to petition the government, the use of torture by the government, the independence of the judiciary, the country’s degree of religious tolerance, whether citizens enjoy equal treatment under the law, basic security and personal freedoms, the protection of private property rights, perceptions on protections of human rights, the degree of discrimination and the extent to which the government curbs civil liberties.

3. The functioning of government

Indicators relate to whether freely elected officials determine government policy, government structure, the influence of military, foreign powers and special interest groups on governing, accountability to the electorate, whether governmental authority extends over the entire country, transparency of governance, the pervasiveness of corruption, the function

of the civil service, popular perceptions of the extent to which citizens have free choice and control over their lives, and public confidence in government and political parties.

4. Political participation

Indicators relate to voter participation and turnout in national elections, whether ethnic, religious and other minorities have a reasonable degree of autonomy and voice in the political process, representation of women in government, the extent of political participation and engagement, the extent to which the population follows politics and is prepared to participate in lawful demonstrations, adult literacy, and the degree to which political participation is promoted.

5. Political culture

Indicators relate to the stability of democracy, perception of leadership and whether the population would prefer rule by strong leaders, the military, or technocrats, perceptions on the relationships between democracy and public order and economic performance, the degree of popular support for democracy, and the tradition of separation of church and state.

The higher a country's Democracy Score, the more democratic is the country, while the lower a country's Democracy Score, the less democratic is the country. The Index Provider has constructed the Index in order to overweight, in the aggregate, investment in democracies that embrace ideals such as freedom of speech, fair elections and civil liberties and underweight, in the aggregate, investment in authoritarian states with links to human rights abuses such as genocide and child labor, as well as environmental abuses and government corruption. The Index is designed for investors whose values align with this investment thesis.

The Index Provider determines the country in which each company in the Index is located based on the "country of risk" designation assigned to the company by Refinitiv. A company's country of risk designation is based on a number of criteria, including the country in which the company is domiciled, the primary stock exchange on which the company's shares trade, the location from which the majority of the company's revenues are generated, and the company's reporting currency.

The Index construction process begins with the universe of companies that are current members of the Solactive Index. As of April 15, 2024, the Solactive Index consists of over 2,900 individual companies representing 49 countries and intends to track the performance of the large and mid cap segment covering approximately the largest 85% of the free-float market capitalization in global markets (as determined by Solactive), excluding the United States. The Index Provider first uses the country of risk assigned by a third party data provider

(such as Refinitiv or Bloomberg) to each company in the Solactive Index to determine the country in which each such company is located. The Index Provider then multiplies each company's market capitalization weighting in the Solactive Index by the Democracy Score of the country in which the company is determined to be located and normalizes the products to sum to 100%. In other words, the weight of a specific company in the Index is the product of the company's Democracy Score and its market capitalization weighting in the Solactive Index (the "Market Capitalization Product") divided by the sum of all the Market Capitalization Products of all companies in the Index. As a result, each company in the Solactive Index is represented in the Index, but with a different weighting that results from its Democracy Score. In this regard, the Index will consist of companies from countries with both high and low Democracy Scores, but companies located in countries with higher Democracy Scores generally are weighted more heavily in the aggregate and companies located in countries with lower Democracy Scores are weighted less heavily in the aggregate. The Index is currently weighted more heavily in companies located in countries from developed markets as compared to emerging markets. The Index is rebalanced and reconstituted on a quarterly basis.

In constructing the Fund's portfolio, the Adviser generally will use a representative sampling investment approach designed to achieve the Fund's investment objective. In doing so, the Fund generally will hold (i) the securities of certain, but not all, Index constituents, consisting of common stocks and ADRs of large- and medium-capitalization companies, and (ii) shares of country and regional-specific ETFs, in combination such that the Fund's returns are designed to track the total return performance, before fees and expenses, of the Index, and the Fund's portfolio is designed to approximate the Index's country and sector weightings, and other characteristics such as market capitalization. The Adviser's representative sampling strategy will result in the Fund (i) having exposure to companies that are located in the same countries as companies in the Index but that are not themselves Index constituents, and (ii) not owning or otherwise not having exposure to companies that are included in the Index. ETFs currently represent a significant portion of the Fund's portfolio.

In addition to investing in ETFs as discussed above, the Fund also may invest in securities or other investments not included in the Index, but which the Adviser believes will help the Fund to track the Index. For example, the Fund may invest in securities that are not components of the Index so as to reflect various corporate actions and other changes to the Index (such as Index reconstitutions, additions, and deletions).

The Fund may from time to time invest a significant portion of its assets in the securities of companies in one or more countries, geographic regions or economic sectors. As of the date of this Prospectus, the Fund has significant exposure to the financials sector, as defined by GICS.

Temporary Defensive Measures

The Adviser does not engage in temporary defensive investing with respect to the Fund. The Adviser keeps the Fund's assets fully invested in all market environments. As a result, the Fund may be more vulnerable to market movements that are adverse to the Fund's investment objective than funds that engage in temporary defensive investing strategies. The Adviser monitors the Fund on an ongoing basis, and makes adjustments to its portfolio, as necessary, to minimize tracking error and to maximize liquidity.

Additional Investments

This prospectus describes the Fund's principal investment strategies and risks, and the Fund will normally invest in the types of instruments described in this prospectus. In addition to the instruments and strategies described in this prospectus, the Fund may invest in other instruments, or use other investment strategies to a lesser extent. These instruments and strategies are described in detail in the Fund's Statement of Additional Information (the "SAI") (for information on how to obtain a copy of the SAI see the back cover of this prospectus).

MORE INFORMATION ABOUT RISKS

Investing in the Fund involves risk and there is no guarantee that the Fund will achieve its goals. In fact, no matter how good of a job the Adviser and/or Sub-Adviser does, you could lose money on your investment in the Fund, just as you could with similar investments.

The value of your investment in the Fund is based on the value of the securities the Fund holds. These prices change daily due to economic and other events that affect particular companies and other issuers. These price movements, sometimes called volatility, may be greater or lesser depending on the types of securities the Fund owns and the markets in which they trade. The effect on the Fund of a change in the value of a single security will depend on how widely the Fund diversifies its holdings.

Democracy Focused Investments Risk — The Index, and thus the Fund's portfolio, generally weights more heavily in the aggregate companies located in countries with higher Democracy Scores and weights less heavily in the aggregate companies located in countries with lower Democracy Scores. A company's financial performance is determined by a number of factors, and whether or not the company is located in a country with a higher Democracy Score may have little or no impact on whether the company performs well financially or positively affects the Fund's performance. Companies located in countries with higher Democracy Scores may underperform companies located in countries with lower Democracy Scores. The Fund may forego some market

opportunities available to funds that do not invest in a company based on the Democracy Score of the country in which it is located and, therefore, the Fund may underperform such other funds.

In addition, the Index's methodology weights a company based on the product of its Democracy Score and market capitalization. Accordingly, the Fund may hold the securities of companies with large market capitalizations located in countries with lower Democracy Scores in greater weight than the securities of companies located in countries with higher Democracy Scores. In this regard, shareholders may have significant exposure to particular companies located in more authoritarian countries and will at all or most times have some exposure to companies located in more authoritarian countries.

Equity Market Risk — Because the Fund may invest in equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund's securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. The market as a whole may not favor the types of investments the Fund makes. Many factors can adversely affect a security's performance, including both general financial market conditions and factors related to a specific company, industry or geographic region. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Recent examples include pandemic risks related to COVID-19 and aggressive measures taken worldwide in response by governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff. During a general economic downturn in the securities markets, multiple asset classes may be negatively affected. In the case of foreign stocks, these fluctuations will reflect international economic and political events, as well as changes in currency valuations relative to the U.S. dollar. These factors contribute to price volatility, which is a principal risk of investing in the Fund.

Common Stock Risk — The price of common stocks may fall over short or extended periods of time. Common stock prices are sensitive to general movements in the equity markets, and a drop in the equity markets may cause the price of common stocks held by the Fund to decrease in value. Individual

companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of common stock issued by such companies may suffer a decline in response. Common stock generally is subordinate to preferred stock and debt upon the liquidation or bankruptcy of the issuing company.

Foreign Securities/Emerging Markets Risk — Investments in securities of foreign companies can be more volatile than investments in U.S. companies. Diplomatic, political, or economic developments, including nationalization or appropriation, could affect investments in foreign companies. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Financial statements of foreign issuers are governed by different accounting, auditing, and financial reporting standards than the financial statements of U.S. issuers and may be less transparent and uniform than in the United States. Thus, there may be less information publicly available about foreign issuers than about most U.S. issuers. Transaction costs are generally higher than those in the United States and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these taxes are recoverable, the non-recovered portion will reduce the income received from the securities comprising the Fund's portfolio. These risks may be heightened with respect to emerging market countries since political turmoil and rapid changes in economic conditions are more likely to occur in these countries. Additionally, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may result in the Fund having to sell such prohibited securities at inopportune times. Such prohibited securities may have less liquidity as a result of such U.S. Government designation and the market price of such prohibited securities may decline, which may cause the Fund to incur losses.

Currency Risk — Currency exchange rates may fluctuate in response to factors extrinsic to that country's economy, which makes the forecasting of currency market movements extremely difficult. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad. These can result in losses to the Fund if it is unable to deliver or receive currency or funds in settlement of obligations and could also cause hedges it has entered into to be rendered

useless, resulting in full currency exposure as well as incurring transaction costs. The value of the Fund's investments may fluctuate in response to broader macroeconomic risks than if the Fund invested only in U.S. equity securities.

Geographic Focus Risk — To the extent that it focuses its investments in a particular country or geographic region, the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that country or geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

Investments in Investment Companies Risk — The Fund may purchase shares of investment companies. When the Fund invests in an investment company, it will bear a pro rata portion of the investment company's expenses in addition to directly bearing the expenses associated with its own operations. Such expenses may make owning shares of an investment company more costly than owning the underlying securities directly. In part because of these additional expenses, the performance of an investment company may differ from the performance the Fund would achieve if it invested directly in the underlying investments of the investment company. In addition, while the risks of owning shares of an investment company generally reflect the risks of owning the underlying investments of the investment company, the Fund may be subject to additional or different risks than if the Fund had invested directly in the underlying investments.

ETFs — ETFs are pooled investment vehicles whose shares are listed and traded on U.S. and non-U.S. stock exchanges. To the extent that the Fund invests in ETFs, the Fund will be subject to substantially the same risks as those associated with the direct ownership of the securities in which the ETF invests, and the value of the Fund's investment will fluctuate in response to the performance of the ETF's holdings. ETFs typically incur fees that are separate from those of the Fund. Accordingly, the Fund's investments in ETFs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the ETFs' operating expenses, in addition to paying Fund expenses. Because the value of ETF shares depends on the demand in the market, shares may trade at a discount or premium to their NAV and the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, which could adversely affect the Fund's performance.

Large Capitalization Companies Risk — If valuations of large capitalization companies appear to be greatly out of proportion to the valuations of small or medium capitalization companies, investors may migrate to the stocks of small and medium-sized companies. Additionally, larger, more established companies may be unable to respond quickly to new competitive challenges

such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Medium Capitalization Companies Risk — The risk that medium capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, medium capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, medium capitalization stocks may be more volatile than those of larger companies.

ETF Risks — The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:

Index Tracking Risk — Tracking error refers to the risk that the Adviser and/or Sub-Adviser may not be able to cause the Fund's performance to match or correlate to that of the Index, either on a daily or aggregate basis. Because it uses a representative sampling approach, the Fund may experience a greater degree of tracking error than if the Fund sought to hold all of the securities of the Index in proportion to their weighting in the Index. There are a number of factors that may contribute to the Fund's tracking error, such as Fund expenses, imperfect correlation between the Fund's investments and those of the Index, rounding of share prices, the timing or magnitude of changes to the composition of the Index, regulatory policies, and high portfolio turnover rate. The Fund incurs operating expenses not applicable to its Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index. In addition, mathematical compounding may prevent the Fund from correlating with the monthly, quarterly, annual or other period performance of its index. Tracking error may cause the Fund's performance to be less than expected.

Passive Investment Risk — The Fund is not actively managed. Therefore, unless a specific security is removed from the Index, or selling that security is otherwise required upon a rebalancing of the Index as addressed in the Index methodology, the Fund generally would not sell a security because the security's issuer was in financial trouble. If a specific security is removed from the Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security's current market value. An investment in the Fund involves risks similar to those of investing in any equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. It is anticipated that the value of the Fund's shares will decline, more or less, in correspondence with any decline in value of the Index. The Index may not contain the appropriate mix of securities for

any particular point in the business cycle of the overall economy, particular economic sectors, or narrow industries within which the commercial activities of the companies comprising the portfolio securities holdings of the Fund are conducted, and the timing of movements from one type of security to another in seeking to replicate the Index could have a negative effect on the Fund. Unlike other funds that select investments based on analyses of financial or other information relating to companies, the economy or markets, the Fund invests in companies included in the Index in accordance with its investment objective of tracking the performance of the Index. There can be no assurance that an investment in such companies would not underperform the broader market or investments with a different focus. The Fund should not be considered a complete investment program. Unlike with an actively managed fund, the Adviser does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than other types of mutual funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline.

Trading Risk — Although Fund shares are listed for trading on a listing exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Secondary market trading in the Fund's shares may be halted by a listing exchange because of market conditions or for other reasons. In addition, trading in the Fund's shares is subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules. There can be no assurance that the requirements necessary to maintain the listing of the Fund's shares will continue to be met or will remain unchanged.

Shares of the Fund may trade at, above or below their most recent NAV. The per share NAV of the Fund is calculated at the end of each business day and fluctuates with changes in the market value of the Fund's holdings since the prior most recent calculation. The trading prices of the Fund's shares will fluctuate continuously throughout trading hours based on market supply and demand. In stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying holdings, which may cause a variance in the market price of the Fund shares and their underlying value. The trading prices of the Fund's shares may deviate significantly from NAV during periods of market volatility. These factors, among others, may lead to the Fund's shares trading at a premium or discount to NAV. However, given that shares can be created and redeemed only in Creation Units at NAV, the Adviser does not believe that large discounts or premiums to NAV will exist for extended periods of time. While the creation/redemption feature is designed to make it likely that

the Fund's shares normally will trade close to the Fund's NAV, exchange prices are not expected to correlate exactly with the Fund's NAV due to timing reasons as well as market supply and demand factors. In addition, disruptions to creations and redemptions or the existence of extreme volatility may result in trading prices that differ significantly from NAV. If a shareholder purchases at a time when the market price of the Fund is at a premium to its NAV or sells at time when the market price is at a discount to the NAV, the shareholder may sustain losses.

Investors buying or selling shares of the Fund in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for shares (the "bid" price) and the price at which an investor is willing to sell shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for shares based on trading volume and market liquidity, and is generally lower if the Fund's shares have more trading volume and market liquidity and higher if the Fund's shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling shares of the Fund, including bid/ask spreads, frequent trading of such shares may significantly reduce investment results and an investment in the Fund's shares may not be advisable for investors who anticipate regularly making small investments.

Methodology Risk — The Fund seeks to track the performance of the Index. No assurance can be given that stocks of companies chosen for the Index will outperform stocks of other companies. Moreover, there is no guarantee or assurance that the methodology used to create the Index will result in the Fund achieving positive investment returns or outperforming other investment products.

New Index Provider Risk — The Index was created by and is owned and maintained by the Index Provider, which has not previously been an index provider for a registered fund, which may create additional risks for investing in the Fund. There is no assurance that the Index Provider will compile the Index accurately, or that the Index will be reconstituted, rebalanced or disseminated accurately.

Limited Authorized Participants, Market Makers and Liquidity Providers Risk — Only an Authorized Participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of financial institutions that may act as Authorized Participants. In

addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material discount to NAV and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. An active trading market for shares of the Fund may not develop or be maintained, and, particularly during times of market stress, Authorized Participants or market makers may step away from their respective roles in making a market in shares of the Fund and in executing purchase or redemption orders. This could, in turn, lead to variances between the market price of the Fund's shares and the value of its underlying securities.

Cash Transactions Risk — Unlike certain ETFs, the Fund may effect some or all creations and redemptions using cash, rather than in-kind securities. Because of this, the Fund may incur costs such as brokerage costs or be unable to realize certain tax benefits associated with in-kind transfers of portfolio securities that may be realized by other ETFs. These costs may decrease the Fund's NAV to the extent that the costs are not offset by a transaction fee payable by an Authorized Participant. Shareholders may be subject to tax on gains they would not otherwise have been subject to and/or at an earlier date than if the Fund had effected redemptions wholly on an in-kind basis.

ADR Risk — ADRs are typically trust receipts issued by a U.S. bank or trust company that evidence an indirect interest in underlying securities issued by a foreign entity. Investments in non-U.S. issuers through ADRs and other types of depositary receipts generally involve risks applicable to other types of investments in non-U.S. issuers. Investments in depositary receipts may be less liquid and more volatile than the underlying securities in their primary trading market. If a depositary receipt is denominated in a different currency than its underlying securities, the Fund will be subject to the currency risk of both the investment in the depositary receipt and the underlying security. The values of depositary receipts may decline for a number of reasons relating to the issuers or sponsors of the depositary receipts, including, but not limited to, insolvency of the issuer or sponsor. Holders of depositary receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action. The prices of depositary receipts may differ from the prices of securities upon which they are based.

Issuer-Specific Risk — Changes in the financial condition of an issuer, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller,

less well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of the Fund.

Liquidity Risk — Liquidity risk exists when particular investments are difficult to purchase or sell. The market for certain investments may become illiquid due to specific adverse changes in the condition of a particular issuer or under adverse market or economic conditions independent of the issuer. The Fund's investments in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price. Liquidity risk may be heightened in the emerging market countries as a result of their markets being less developed.

Sector Focus Risk — Because the Fund may, from time to time, be more heavily invested in particular sectors, the value of its shares may be especially sensitive to factors and economic risks that specifically affect those sectors. As a result, the Fund's share price may fluctuate more widely than the value of shares of a fund that invests in a broader range of sectors.

Financials Sector Risk — A fund that focuses in the financials sector may be subject to greater risks than a portfolio without such a focus. Companies in the financials sector of an economy are subject to extensive governmental regulation and intervention, which may adversely affect the scope of their activities, the prices they can charge, the amount of capital they must maintain and, potentially, their size. Governmental regulation may change frequently and may have significant adverse consequences for companies in the financials sector, including effects not intended by such regulation. The impact of more stringent capital requirements, or recent or future regulation in various countries of any individual financial company or of the financials sector as a whole cannot be predicted. Certain risks may impact the value of investments in the financials sector more severely than those of investments outside this sector, including the risks associated with companies that operate with substantial financial leverage. Companies in the financials sector may also be adversely affected by increases in interest rates and loan losses, decreases in the availability of money or asset valuations, credit rating downgrades and adverse conditions in other related markets. Insurance companies, in particular, may be subject to severe price competition and/or rate regulation, which may have an adverse impact on their profitability. The financials sector is particularly sensitive to fluctuations in interest rates. The financials sector is also a target for cyber attacks, and may experience technology malfunctions and disruptions. In recent years, cyber attacks and technology failures have become increasingly frequent in this sector and have reportedly caused losses to companies in this sector, which may negatively impact the Fund.

INFORMATION ABOUT PORTFOLIO HOLDINGS

A description of the Fund's policies and procedures with respect to the circumstances under which the Fund discloses its portfolio holdings is available in the Fund's Statement of Additional Information (the "SAI").

INVESTMENT ADVISER

Democracy Investment Management LLC, a Delaware limited liability company, serves as the investment adviser to the Fund. The Adviser's principal place of business is 1480 Moraga Road, Suite C #378, Moraga, California 94556. Juliette M. Cane, CEO and Managing Partner of the Adviser, is a U.S. Navy veteran and has served as CEO since the Adviser was founded in August of 2020. The Adviser is both majority women-owned and veteran-owned. As of March 31, 2024, the Adviser had approximately \$8 million in assets under management.

The Adviser oversees the day-to-day operations of the Fund, subject to the oversight of the Board. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, distribution and all other services necessary for the Fund to operate. Further, the Adviser continuously reviews, supervises, and administers the Fund's investment program. In particular, the Adviser provides investment and operational oversight of the Sub-Adviser. The Board oversees the Adviser and establishes policies that the Adviser must follow in its day-to-day management activities.

For its services to the Fund, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at an annual rate of 0.50% of the average daily net assets of the Fund. The Adviser, in turn, compensates the Sub-Adviser from the management fee it receives.

Under the investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser, the Adviser has agreed to pay all expenses incurred by the Fund except for the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (the "1940 Act").

The Adviser has contractually agreed to waive fees and reimburse expenses in the amount of the Acquired Fund Fees and Expenses incurred by the Fund until April 30, 2025. This agreement may be terminated: (i) by the Board, for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on April 30, 2025.

For the fiscal year ended December 31, 2023, the Fund paid 0.38% of its average daily net assets (after fee waivers) in advisory fees to the Adviser.

A discussion regarding the basis for the Board's approval of the Fund's investment advisory agreement is available in the Fund's Semi-Annual Report to Shareholders dated June 30, 2023 which covers the period from January 1, 2023 to June 30, 2023.

SUB-ADVISER

Vident Asset Management (the "Sub-Adviser"), a Delaware limited liability company located at 1125 Sanctuary Pkwy., Suite 515, Alpharetta, Georgia 30009, is responsible for the day-to-day management of the Fund. As of March 31, 2024, the Sub-Adviser had approximately \$10.4 billion in assets under management.

The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the Index, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the oversight of the Adviser and the Board.

For its services, the Sub-Adviser is entitled to a fee from the Adviser, which fee is calculated daily and paid monthly, at an annual rate of 0.07% based on the average daily net assets of the Fund for assets up to \$250 million, 0.06% based on the average daily net assets of the Fund when assets exceed \$250 million, and 0.05% based on the average daily net assets of the Fund when assets exceed \$500 million, subject to a minimum annual fee of \$45,000.

A discussion regarding the basis for the Board's approval of the Fund's investment sub-advisory agreement is available in the Fund's Annual Report to Shareholders dated December 31, 2023, which covers the period from January 1, 2023 to December 31, 2023.

PORTFOLIO MANAGERS

Democracy Investment Management LLC

Christopher Browne, CFA, Chief Investment Officer of the Adviser, serves as a portfolio manager of the Fund since its inception in 2021. Prior to joining the Adviser in 2020, Mr. Browne was a Solutions Portfolio Manager for Franklin Templeton Investments, where he advised institutions and family offices on multi-asset portfolio construction. Before his employment at Franklin Templeton in 2010, Mr. Browne was a fixed income portfolio manager at California Investment Trust (now Shelton Capital), where he managed all fixed income for the firm. Other relevant experience includes Senior Manager at

Autodesk Ventures, Principal at BayStar Capital, and Portfolio Administrator at Harris Bretall Sullivan & Smith, as well as Pacific Income Advisers. Mr. Browne received his MBA in International Business from Thunderbird, the American Graduate School of International Management, and has a B.A. in English from the University of California – Santa Barbara. Mr. Browne maintains an active Financial Industry Regulatory Authority (“FINRA”) Series 63 license and FINRA Series 7 license from Arq Advisors LLC, at which Mr. Browne is a registered representative. Additionally, he has earned the right to use the Chartered Financial Analyst® designation.

Vident Asset Management

Rafael Zayas, CFA, serves as a portfolio manager of the Fund since its inception in 2021. Mr. Zayas has over 15 years of trading and portfolio management experience. He became Senior Vice President, Head of Portfolio Management and Trading at the Sub-Adviser in June 2020. From 2017 to 2020, he was Senior Portfolio Manager – International Equity at the Sub-Adviser. Prior to joining the Sub-Adviser, he was a Portfolio Manager – Direct Investments for seven years at Russell Investments, a global asset manager, where he co-managed more than \$5 billion in quantitative strategies across global markets. Mr. Zayas also helped Russell Investments launch its sponsored ETF initiative and advised on index methodologies. Prior to joining Russell Investments, Mr. Zayas was a Portfolio Manager – Equity Indexing at Mellon Capital Management, where he managed assets for internationally listed global equity ETFs. Mr. Zayas graduated with a BS in Electrical Engineering from Cornell University. He also attained the Chartered Financial Analyst designation in 2010.

Austin Wen, CFA, serves as a portfolio manager of the Fund since April 2024. Mr. Wen has over a decade of investment experience. He is a Portfolio Manager at Vident, specializing in portfolio management and trading of equity, derivative, and commodities-based portfolios, as well as risk monitoring and investment analysis. Previously, he was an analyst for Vident Financial, working on the development and review of investment solutions. He began his career as a State Examiner for the Georgia Department of Banking and Finance. Mr. Wen obtained a BA in Finance from the University of Georgia and holds the Chartered Financial Analyst designation.

The SAI provides additional information about the portfolio managers’ compensation, other accounts managed, and ownership of Fund shares.

PURCHASING AND SELLING FUND SHARES

Shares of the Fund are listed for trading on the Exchange. When you buy or sell the Fund’s shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay

some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares of the Fund will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of such shares. A business day with respect to the Fund is any day on which the Exchange is open for business. The Exchange is generally open Monday through Friday and is closed on weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

The Fund's NAV is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding. NAV is determined each business day, normally as of the close of regular trading of the New York Stock Exchange (ordinarily 4:00 p.m., Eastern time).

In calculating NAV, the Fund generally values its investment portfolio at market price. If market prices are not readily available or they are unreliable, such as in the case of a security value that has been materially affected by events occurring after the relevant market closes, securities are valued at fair value. The Board has designated the Adviser as the Fund's valuation designee to make all fair value determinations with respect to the Fund's portfolio investments, subject to the Board's oversight. The Adviser has adopted and implemented policies and procedures to be followed when making fair value determinations, and it has established a Valuation Committee through which the Adviser makes fair value determinations. The Adviser's determination of a security's fair value price often involves the consideration of a number of subjective factors, and is therefore subject to the unavoidable risk that the value that is assigned to a security may be higher or lower than the security's value would be if a reliable market quotation for the security was readily available. The respective prospectuses for the open-end investment companies in which the Fund invests explain the circumstances in which those investment companies will use fair value pricing and the effect of fair value pricing.

With respect to non-U.S. securities held by the Fund, the Adviser may take factors influencing specific markets or issuers into consideration in determining the fair value of a non-U.S. security. Foreign securities markets may be open on days when the U.S. markets are closed. In such cases, the value of any foreign securities owned by the Fund may be significantly affected on days when investors cannot buy or sell shares. In addition, due to the difference in times between the close of the foreign markets and the time as of which the Fund prices its shares, the value the Adviser assigns to securities may not be the same as the quoted or published prices of those securities on their primary markets or exchanges. In determining fair value prices, the Adviser may consider the performance of securities on their primary exchanges, foreign currency

appreciation/depreciation, securities market movements in the United States, or other relevant information related to the securities.

There may be limited circumstances in which the Fund would price securities at fair value for stocks of U.S. companies that are traded on U.S. exchanges – for example, if the exchange on which a portfolio security is principally traded closed early or if trading in a particular security was halted during the day and did not resume prior to the time the Fund calculated its NAV.

Redeemable securities issued by open-end investment companies in which the Fund invests are valued at the investment company's applicable NAV.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Index. This may result in a difference between the Fund's performance and the performance of the Index.

PAYMENTS TO FINANCIAL INTERMEDIARIES

The Fund and/or the Adviser may compensate financial intermediaries for providing a variety of services to the Fund and/or its shareholders. Financial intermediaries include affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Fund, its service providers or their respective affiliates. This section briefly describes how financial intermediaries may be paid for providing these services. For more information, please see "Payments to Financial Intermediaries" in the SAI.

Distribution Plan

The Fund has adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act, that allows the Fund to pay distribution and/or service fees for the sale and distribution of Fund shares, and for services provided to shareholders. No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because these fees are paid out of the Fund's assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. The maximum annual Rule 12b-1 fee is 0.25% of the average daily net assets of the Fund.

Payments by the Adviser

From time to time, the Adviser and/or its affiliates, in their discretion, may make payments to certain affiliated or unaffiliated financial intermediaries to compensate them for the costs associated with distribution, marketing, administration and shareholder servicing support for the Fund. These payments are sometimes characterized as “revenue sharing” payments and are made out of the Adviser’s and/or its affiliates’ own legitimate profits or other resources, and may be in addition to any payments made to financial intermediaries by the Fund. A financial intermediary may provide these services with respect to Fund shares sold or held through programs such as retirement plans, qualified tuition programs, fund supermarkets, fee-based advisory or wrap fee programs, bank trust programs, and insurance (e.g., individual or group annuity) programs. In addition, financial intermediaries may receive payments for making shares of the Fund available to their customers or registered representatives, including providing the Fund with “shelf space,” placing it on a preferred or recommended fund list, or promoting the Fund in certain sales programs that are sponsored by financial intermediaries. To the extent permitted by SEC and FINRA rules and other applicable laws and regulations, the Adviser and/or its affiliates may pay or allow other promotional incentives or payments to financial intermediaries.

The level of payments made by the Adviser and/or its affiliates to individual financial intermediaries varies in any given year and may be negotiated on the basis of sales of Fund shares, the amount of Fund assets serviced by the financial intermediary or the quality of the financial intermediary’s relationship with the Adviser and/or its affiliates. These payments may be more or less than the payments received by the financial intermediaries from other mutual funds and may influence a financial intermediary to favor the sales of certain funds or share classes over others. In certain instances, the payments could be significant and may cause a conflict of interest for your financial intermediary. Any such payments will not change the NAV or price of the Fund’s shares. Please contact your financial intermediary for information about any payments it may receive in connection with the sale of Fund shares or the provision of services to Fund shareholders.

In addition to these payments, your financial intermediary may charge you account fees, commissions or transaction fees for buying or redeeming shares of the Fund, or other fees for servicing your account. Your financial intermediary should provide a schedule of its fees and services to you upon request.

OTHER POLICIES

Excessive Trading Policies and Procedures

The Fund does not impose any restrictions on the frequency of purchases and redemptions of Creation Units; however, the Fund reserves the right to reject or limit purchases at any time as described in the SAI. When considering that no restriction or policy was necessary, the Board evaluated the risks posed by arbitrage and market timing activities, such as whether frequent purchases and redemptions would interfere with the efficient implementation of the Fund's investment strategy, or whether they would cause the Fund to experience increased transaction costs. The Board considered that, unlike traditional mutual funds, shares of the Fund are issued and redeemed only in large quantities of shares known as Creation Units available only from the Fund directly to Authorized Participants, and that most trading in the Fund occurs on the Exchange at prevailing market prices and does not involve the Fund directly. Given this structure, the Board determined that it is unlikely that trading due to arbitrage opportunities or market timing by shareholders would result in negative impact to the Fund or its shareholders. In addition, frequent trading of the Fund's shares by Authorized Participants and arbitrageurs is critical to ensuring that the market price remains at or close to NAV.

DIVIDENDS, DISTRIBUTIONS AND TAXES

Fund Distributions

The Fund distributes its net investment income, if any, at least quarterly, and makes distributions of its net realized capital gains, if any, at least annually. If you own Fund shares on the Fund's record date, you will be entitled to receive the distribution.

Dividend Reinvestment Service

Brokers may make available to their customers who own shares of the Fund the Depository Trust Company book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the Fund purchased on the secondary market. Without this service, investors would receive their distributions in cash. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables.

Tax Information

The following is a summary of certain important U.S. federal income tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a comprehensive explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. Your investment in the Fund may have other tax implications. More information about taxes is located in the SAI.

You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.

Tax Status of the Fund

The Fund has elected and intends to qualify each year for the special tax treatment afforded to a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). If the Fund maintains its qualification as a RIC and meets certain minimum distribution requirements, then the Fund is generally not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, if the Fund fails to qualify as a RIC or to meet minimum distribution requirements it would result (if certain relief provisions are not available) in fund-level taxation and consequently a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through a tax-deferred retirement account, such as an IRA, you need to be aware of the possible tax consequences when the Fund makes distributions, you sell Fund shares, and you purchase or redeem Creation Units (Authorized Participants only).

Tax Status of Distributions

The Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares.

The income dividends you receive from the Fund may be taxed as either ordinary income or “qualified dividend income.” Dividends that are reported by the Fund as qualified dividend income are generally taxable to non-corporate shareholders at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets). Qualified dividend income generally is income derived from dividends paid to the Fund by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends

that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. For such dividends to be taxed as qualified dividend income to a non-corporate shareholder, the Fund must satisfy certain holding period requirements with respect to the underlying stock and the non-corporate shareholder must satisfy holding period requirements with respect to his or her ownership of the Fund's shares. Holding periods may be suspended for these purposes for stock that is hedged.

Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned its shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions from the Fund's net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) are taxable as long-term capital gains regardless of how long you have owned your shares. For non-corporate shareholders, long-term capital gains are generally taxable at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets). Distributions from the Fund's short-term capital gains are generally taxable as ordinary income.

Corporate shareholders may be entitled to a dividends received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. Certain of the Fund's investment strategies may limit its ability to distribute dividends eligible for the dividends received deduction for corporate shareholders.

In general, Fund distributions are subject to federal income tax for the year in which they are paid. However, distributions paid in January but declared by the Fund to shareholders of record in October, November or December of the previous year will be treated as having been received by shareholders on December 31 of the calendar year in which declared, and thus may be taxable to you in the previous year.

You should note that if you purchase shares just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as "buying a dividend" and should generally be avoided by taxable investors.

The Fund (or your broker) will inform you of the amount and character of any distributions shortly after the close of each calendar year.

Tax Status of Share Transactions

Each sale of Fund shares or redemption of Creation Units will generally be a taxable event. Assuming a shareholder holds Fund shares as a capital asset, any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if the shares have been held for more than twelve months. Any capital gain or loss realized upon a sale of Fund shares held for twelve months or less is generally treated as short-term capital gain or loss. Any capital loss on the sale of shares held for six months or less is treated as long-term capital loss to the extent distributions of long-term capital gain were paid (or treated as paid) with respect to such shares. Any loss realized on a sale will be disallowed to the extent shares of the Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the disposition of shares. The ability to deduct capital losses may be limited.

The cost basis of shares of the Fund acquired by purchase will generally be based on the amount paid for the shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of shares generally determines the amount of the capital gain or loss realized on the sale or exchange of shares. Contact the broker through whom you purchased your shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between (i) the market value of the Creation Units at the time of the exchange plus any cash received in the exchange and (ii) the Authorized Participant's aggregate basis in the securities surrendered plus any cash paid for the Creation Units. An Authorized Participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between (i) the Authorized Participant's basis in the Creation Units and (ii) the aggregate market value of the securities and the amount of cash received. The Internal Revenue Service ("IRS"), however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for a person who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position. Authorized Participants should consult their own tax advisor with respect to whether wash sales rules apply and when a loss might be deductible.

The Fund may pay the redemption price for Creation Units at least partially with cash, rather than the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute

redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Foreign Taxes

To the extent that the Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund receives from sources in foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate these taxes. If more than 50% of the total assets of the Fund at the end of the Fund's taxable year consists of foreign securities, the Fund will be eligible to elect to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. The Fund (or your broker) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

Net Investment Income Tax

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (including certain capital gain distributions and capital gains realized on the sale of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors

If you are a nonresident alien individual or a foreign corporation, partnership, trust or estate, (i) the Fund's ordinary income dividends distributed to you will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies but (ii) gains from the sale or other disposition of your shares of the Fund generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per year. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if you are a foreign

shareholder engaged in a trade or business within the United States or if you are a foreign shareholder entitled to claim the benefits of a tax treaty.

Backup Withholding

The Fund (or financial intermediaries, such as brokers, through which shareholders own shares) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that the shareholder is not subject to such withholding.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in the Fund under all applicable tax laws.

More information about taxes is included in the SAI.

ADDITIONAL INFORMATION

Continuous Offering

The method by which Creation Units are purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Fund on an ongoing basis, at any point a “distribution,” as such term is used in the Securities Act of 1933 (the “Securities Act”), may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Fund’s distributor, breaks them down into individual shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares of the Fund. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not

be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in shares of the Fund, whether or not participating in the distribution of such shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available with respect to such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer-firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with shares of the Fund that are part of an “unsold allotment” within the meaning of Section 4(a)(3)(C) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to shares of the Fund are reminded that under Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the Fund’s prospectus is available on the SEC’s electronic filing system. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

Premium/Discount Information

Information regarding how often the shares of the Fund traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund for various time periods can be found at www.democracyinvestments.com.

Contractual Arrangements

The Trust enters into contractual arrangements with various parties, including, among others, the Fund’s investment adviser, sub-adviser, custodian, transfer agent, accountants, administrator and distributor, who provide services to the Fund. Shareholders are not parties to, or intended (or “third-party”) beneficiaries of, any of those contractual arrangements, and those contractual arrangements are not intended to create in any individual shareholder or group of shareholders any right to enforce the terms of the contractual arrangements against the service providers or to seek any remedy under the contractual arrangements against the service providers, either directly or on behalf of the Trust.

This prospectus and the SAI provide information concerning the Trust and the Fund that you should consider in determining whether to purchase shares of the Fund. The Fund may make changes to this information from time to time. Neither this prospectus, the SAI or any document filed as an exhibit to the Trust’s registration statement, is intended to, nor does it, give rise to an agreement or contract between the Trust or the Fund and any shareholder, or

give rise to any contract or other rights in any individual shareholder, group of shareholders or other person other than any rights conferred explicitly by federal or state securities laws that may not be waived.

FINANCIAL HIGHLIGHTS

The table that follows presents performance information about the Fund. This information is intended to help you understand the Fund's financial performance for the period of the Fund's operations. Some of this information reflects financial information for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information provided below has been audited by PricewaterhouseCoopers LLP, independent registered public accounting firm for the Fund. The financial statements and the unqualified opinion of PricewaterhouseCoopers LLP are included in the 2023 Annual Report of the Fund, which is available upon request by calling the Fund at 1-877-776-3629.

Privacy Notice

This information is not part of the prospectus.

The Fund recognizes and respects the privacy concerns of its customers. The Fund collects nonpublic personal information about you in the course of doing business with shareholders and investors. “Nonpublic personal information” is personally identifiable financial information about you. For example, it includes information regarding your social security number, account balance, bank account information and purchase and redemption history.

The Fund collects this information from the following sources:

- Information we receive from you on applications or other forms;
- Information about your transactions with us and our service providers, or others;
- Information we receive from consumer reporting agencies (including credit bureaus).

What information the Fund discloses and to whom the Fund discloses information.

The Fund only discloses nonpublic personal information the Fund collects about shareholders as permitted by law. For example, the Fund may disclose nonpublic personal information about shareholders:

- To government entities, in response to subpoenas or to comply with laws or regulations.
- When you, the customer, direct the Fund to do so or consent to the disclosure.
- To companies that perform necessary services for the Fund, such as shareholder servicing centers that the Fund uses to process your transactions or maintain your account.
- To protect against fraud, or to collect unpaid debts.

Information about former customers.

If you decide to close your account(s) or become an inactive customer, we will adhere to the privacy policies and practices described in this notice.

How the Fund safeguards information.

The Fund conducts its business affairs through trustees, officers and third parties that provide services pursuant to agreements with the Fund (for example, the service providers described above). We restrict access to your personal and account information to those persons who need to know that information in order to provide services to you. The Fund or its service providers maintain physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

Customers of other financial institutions.

In the event that you hold shares of the Fund through a financial intermediary, including, but not limited to, a broker-dealer, bank or trust company, the privacy policy of your financial intermediary will govern how your non-public personal information will be shared with non-affiliated third parties by that entity.
